Education

B.Tech in Computer Science and Engineering — CGPA: 8.01 July 2023 - June 2027
Shri Mata Vaishno Devi University *Katra, J&K*

Class XII (CBSE) - 82.05% 2021 - 2023
Kendriya Vidyalaya No. 2 Jammu *Jammu, J&K*

Class X (CBSE) - 85.75% 2020 - 2021
Kendriya Vidyalaya No. 2 Jammu *Jammu, J&K*

Technical Skills

Languages: JavaScript, Python, C, Java
Web Technologies: React.js, Node.js, Express.js, HTML, CSS, Bootstrap, Tailwind CSS
Databases: MongoDB, MySQL, Oracle
Developer Tools: Git, GitHub, CMD, Postman
Core Subjects: DBMS, Computer Networks, Cloud Computing, Data Structures & Algorithms

Experience

Full Stack Web Developer Intern May 2026 - July 2026
FitBox Sports *Remote*

- Developed and maintained the official website for FitBox Sports, serving 1M+ customers with responsive user interfaces.
- Built React.js based frontend components and collaborated on backend feature integration.
- Optimized website performance, database interactions, and overall user experience.

Full Stack Web Development Intern June 2025 - August 2025
Indian Institute of Technology Jammu *On-site*

- Worked on MERN stack web application development under IIT Jammu mentorship.
- Built responsive frontend interfaces and integrated backend APIs using React.js, Express.js, Node.js, and MongoDB.
- Used Git and GitHub for version control, debugging, and collaborative development.

Projects

AeroXplore.in | *React.js, Express.js, MongoDB*

- Built an aviation-focused blogging platform delivering aerospace news and educational content.
- Developed responsive MERN stack interfaces with scalable content management.
- Optimized navigation, search functionality, and cross-device user experience.

ARTIKA.life - Healthcare Platform | *React.js, Express.js, MongoDB*

- Developed a healthcare platform featuring AI assistance, medicine reminders, and health tracking.
- Implemented responsive frontend components with scalable backend workflows.
- Built secure medical record management and authentication features.

CDN-by-DN - Content Delivery Network Simulator | *React.js, Motion Library*

- Built an interactive CDN simulator demonstrating intelligent edge routing, weighted server selection, cache replication, and origin-to-edge content delivery.
- Implemented real-time telemetry dashboards with CPU load, node health, latency metrics, cache inspection, diagnostics logs, and traffic visualization.
- Developed administrative controls for cache invalidation, replica synchronization, client relocation, overload simulation, and weather-based latency analysis.
